

Senior Process Engineer in Upstream Processing

Date posted: September 04, 2018

Location: Vienna, Austria

Position Summary:

Hookipa Biotech is a Vienna-based biotechnology company developing novel recombinant viral vector vaccines against medically important infectious diseases and cancer. We are searching for a highly motivated, enthusiastic Researcher in the Upstream Processing department for a permanent position.

Main Responsibilities:

- Perform cell culture duties and all associated activities, such as freezing, thawing, passaging and cell counting
- Execute bioreactor runs independently at research scale and intermediate scale.
- Design experiments independently to optimize vector yield
- Take responsibility for all lab related tasks, such as lab organization, material flow, ordering, decontamination, etc.
- Collect analytical data and compile data overviews, presentations and reports
- Design accurate documentation protocols and follow documentation according to GDP

Qualifications:

- PhD level with minimum of 2 years of work experience or related with relevant work experience in the upstream processing field
- Profound knowledge of mammalian cell culture, suspension and adherent cells
- Familiarity with Design of Experiment (DoE) approach to scientific investigations highly preferred
- Expertise in Bioreactor cultivation and In-Process control
- Knowhow in Viral Vector Manufacturing preferred
- Ability to work independently, confident in data collection/interpretation and report writing
- Scientific thinking and organized work style essential

What we offer:

- Strong team with dedicated and passionate researchers
- State of the art infrastructure
- An excellent working atmosphere
- Opportunities for personal development
- Working in a multinational and multicultural environment

Minimum monthly gross salary from EUR 3.000,-; depending on experience and qualification salary can be negotiated. Starting date: As soon as possible
